Nitish Kumar

Java Full Stack Developer | **Spring Boot • REST APIs • SQL • React**

Asansol, India | krnitish769@gmail.com | +91-6295544504 | GitHub: krnitish769 | LinkedIn: krnitish769 | PORTFOLIO

Summary

Java Full Stack Developer with a B.Tech in Computer Science, building reliable, maintainable backend systems with Java, Spring Boot, REST APIs, JDBC, and Oracle SQL. Applies multithreading, exception handling, debugging, and query optimization to write clean, production-minded code, following SDLC and Agile practices. Integrates frontend technologies with backend services end to end, while exploring React, AWS, and AI-assisted development to stay ready for modern software challenges.

Technical Skills

Languages & Frameworks: Java, Spring Boot, RESTful APIs, Servlets, JSP, JDBC, Dependency Injection (IoC), React (Basics), HTML5, CSS3, JavaScript, Python, C/C++

Concepts: Object-Oriented Programming (OOP), Multithreading, Collections, Exception Handling, Debugging, Query Optimization, Indexing, Data Structures & Algorithms (Basics), Agile

Database & Tools: Oracle SQL, SQL, Git, GitHub, IntelliJ IDEA, VS Code

Professional Experience

Operations Representative | **Advisor** Sep 2026 – Present

Concentrix Daksh Services India Pvt. Ltd., Gurugram

- Trained to address customer concerns through chat-based support, covering AWS service configurations, security-related queries, and billing investigations involving service pricing and usage charges.
- Developing knowledge of Core AWS services (EC2, S3, IAM, AWS Organizations, Service Control Policies), focusing on cloud security and access management.

Software Engineer Apprentice (NATS), CAD Institute of Kolkata, Kolkata Sep 2024 – Aug 2025

- Worked on Java practice applications using OOP, multithreading, collections, and exception handling, following modular design principles.
- Coded database-driven backend applications with Spring Boot, Servlets, REST APIs, and JDBC on Oracle SQL, implementing CRUD operations, Dependency Injection (IoC), debugging, and error handling across the SDLC.

Projects

Issue & Ticket Tracking System (Backend) github.com/krnitish769/I&TTS

(Java, Spring Boot, REST APIs, JDBC, Oracle SQL)

- Developed a Spring Boot backend with RESTful APIs to manage the full ticket lifecycle across 100+ simulated issue records.
- Designed a normalized Oracle schema with 6 tables, reducing data redundancy across ticket data.
- Wrote 25+ optimized SQL queries using JDBC for ticket creation, updates, and retrieval.
- Applied indexing and query optimization, cutting average ticket retrieval time by approximately 30%.

Real-Time Chat Application github.com/krnitish769/ChatHaunt

(Java, Socket Programming, TCP/IP, Multithreading)

- Created a client–server chat application supporting 5–7 concurrent users over TCP/IP.
- Implemented multithreaded server logic to handle simultaneous client connections.
- Ensured reliable message delivery between clients using Java socket programming.

Employee Management System github.com/krnitish769/EMS

(Java, JDBC, Oracle SQL, HTML, CSS, JavaScript)

- Built a CRUD application managing 50+ employee records using Java, JDBC, and Oracle SQL.
- Executed 15+ SQL queries for employee data storage and retrieval.
- Integrated a web interface (HTML, CSS, JavaScript) for data entry and updates.

Education

Durgapur Institute of Advanced Technology & Management (M.A.K.A.U.T.) Aug 2022 – Jul 2025

B.Tech in Computer Science and Engineering

Harasankar Bhattacharya Institute of Technology & Mining (W.B.S.C.T.E.) Aug 2019 – Jul 2022

Diploma in Electronics and Instrumentation Engineering

Certifications

Java (Intermediate), HackerRank, Jul 2025 • **SQL (Intermediate)**, HackerRank, Oct 2024

Achievements

Published research paper “VOC-DRONE: AI-Powered Voice-Controlled Aerial System” in a UGC-approved journal (Vol. 11, Issue 12, Dec 2024), on an AI-assisted voice-controlled drone system.
